DETAILED ACTION

1. Claims 1-3, 6-13, 16, 17 and 20-22 are pending in this application.

Claim Rejections - 35 USC § 112

2. Claims 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 9 and 10 recite the use of a photoresist layer while pages 5-6 of the specification teach that the use of photoresist with the hardmask is avoided. Clarification is requested.

Applicant argues that the language is supported by the specification. It appears that Applicant is arguing that only a single layer (either hardmask or photoresist) is used to pattern one feature and then another single layer might be used to pattern another feature. The examiner considers this to conflict with the specification whereby it is stated that "this technique avoids the need to use two layers, e.g. a hardmask and a photoresist layer, in the patterning process" (page 5, lines 4-5). The patterning process is the entire process; it is not limited to one processing step using a layer and then another processing step using a second layer.

Art Unit: 1756

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-3, 6-13, 16, 17 and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leuschner (US Patent 5,556,812).

Leuschner teaches a process of patterning a low k dielectric material. It is taught that a material with a dielectric constant of less than 3 (column 4, lines 41-45) is patterned. Column 6, lines 38-48, and claim 3, teach that the photoresist which is used to pattern the dielectric material contains silicon or can be silylated. After the photoresist material is applied to the dielectric material and patterned, the dielectric material is patterned using an oxygen plasma (column 9, lines 23-25).

Therefore, it would have been obvious to one of ordinary skill in the art to have used a silicon-containing photoresist to etch a low k dielectric material because Leuschner teaches using a photoresist which can contain silicon to etch a low k dielectric material. Leuschner teaches using an oxygen plasma to etch the dielectric material. It is inherent that the oxygen

Art Unit: 1756

plasma would lead to hardening of the silicon-containing photoresist as the etching of the low k dielectric material occurs.

Applicant argues that Leuschner does not teach or suggest hardening the patterned surface prior to etching. The claims use open language ("comprising"), which does not limit the process to hardening before the etching occurs. The steps can occur simultaneously.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
